Urdu

About me

I'm a flexible software engineer and part-time instructor specializing in front-end, back-end, and mobile app development. I use Flutter to create responsive webpages, appealing user interfaces, and cross-platform apps. I'm also familiar with SQL and enjoy working on data-driven solutions. Design and user experience are always at the heart of anything I produce. Along with development, I teach O Level Computer Science and Mathematics to help students connect theory to real-world technology. I'm passionate about creating important initiatives and sharing information along the way.

Experience

Teaching (O/A Level)

2022 - Present

Computer Science 2210

Dedicated O & A Level Computer Science educator with a passion for simplifying complex concepts. Operating as **CSwithFA**, I help students master the Cambridge curriculum, improve their grades, and build a strong foundation in programming and theory.

Front-End Developer

2024 - 2024

MS Global

Front-End Developer & CS Educator. Passionate about building intuitive, responsive user interfaces and empowering the next generation of tech talent. As **CSwithFA**, I teach O & A Level Computer Science while developing modern applications with a focus on clean code and user experience.

Teacher Assistant

2024 - 2025

CSwithSK - Cambridge Teacher

Graded weekly assignments, mock exams, and pseudocode trace tables, providing detailed feedback to help students improve their logic.
